

## Letter of Reference

Mr. Rushikesh Nikumbh born on November 28, 1999 was employed as an intern from August 1, 2024 to December 31, 2024 and subsequently wrote his master thesis in our company in the department Unit Cell & Bipolar Plate Technology from January 1, 2025 to June 30, 2025.

Freudenberg is a global technology group that strengthens its customers and society long-term through forward-looking innovations. Together with our partners, customers and the world of science, we develop leading-edge technologies, and excellent products, solutions and services for 40 market segments. The Freudenberg Group employs some 52,000 people in 60 countries worldwide and generates sales of over 11,9 billion euros.

Trucks, buses, ships - when large loads or many people are set in motion, we are in our element at Freudenberg e-Power Systems. As one of the leading suppliers of emission-neutral energy systems for heavy-duty applications, we offer our customers long-standing expertise and unbeatable know-how. That's because we combine the best of both worlds by offering both battery and fuel cell systems.

During his internship, Mr. Nikumbh was responsible for the following tasks:

- Precise dispensing of sealing and bonding materials for bipolar plates, focusing on uniform and consistent application
- Analysis of applied material profiles using various measurement methods to identify optimization opportunities
- Conducting leak tests on the short stack to ensure the quality of bonded bipolar plates
- Performing Fuji tests to examine force distribution across the bipolar plates
- Adjusting dispensing parameters based on analysis results to improve the process
- Designing specialized fixtures for the bonding process of bipolar plates

During his master thesis, Mr. Nikumbh was responsible for the following tasks:

- Identifying suitable testing methods (leaching, chemical stability, mechanical tests) and implementing the DVP&R framework
- Preparing standardized samples for evaluation according to norms
- Optimizing dispensing speed by adjusting parameters such as inertia factor, pump linearization, and tool geometry
- Developing a vacuum table and gripper for handling
- Designing fixtures for precise alignment and bonding of monopolar plates into complete bipolar plate assemblies
- Creating a scalable process layout for the bonding of bipolar plates

Mr. Nikumbh possesses sound specialist knowledge, which he was always able to apply confidently and in a target-oriented manner in practice. In addition to his role as an intern and writing his master thesis, he participated in our corporate training courses on his own initiative with good results.

His ability to familiarise himself rapidly and his creative thinking enabled him to gain an immediate overview, even in difficult situations, and to identify the most important aspects. Mr. Nikumbh always worked with a high level of initiative and completely identified with his tasks and our company at all times. He always displayed great dedication, which far exceeded his tasks during the internship and master thesis. During the entire preparation phase in our company, Mr. Nikumbh stood out through an exceptional willingness to learn. He consistently completed all his tasks commendably, even under the most difficult working conditions and under extreme stress.

Mr. Nikumbh was focused, very thorough and highly efficient in his work at all times; he always worked with an awareness of quality and responsibility. Mr. Nikumbh always was very reliable and consistently enjoyed our complete trust.

During his internship and the preparation of his master thesis he found good solutions for any problems which arose. The performance of Mr. Nikumbh during his entire period of employment was always fully appreciated by us.

Mr. Nikumbh was always polite and friendly. His conduct in the presence of his line managers, colleagues and business partners was faultless at all times.

Mr. Nikumbh is leaving our company on June 30, 2025 with the submission of the master thesis. We would like to thank him for his consistently good performance and very pleasant collaboration. We wish him continued success and all the best for his future career and private life.

Munich, June 30, 2025

## TO WHOM SO EVER IT MAY CONCERN

This is to certify that **Mr. Rushikesh Suresh Nikumbh**, a student of **NDMVP Samaj's Karmaveer Adv. Baburao Ganpatrao Thakare College of Engineering, Nashik** (Mechanical Engineering) has successfully completed in-plant training in our organization.

The duration of training was from 15<sup>th</sup> July 2020 to 14<sup>th</sup> January 2021. Under the guidance of **Mr. Suresh J. Badgujar**, who has more than 30 years of experience in Manufacturing Industries.

During this training he has learned to operate various manufacturing machines, design tools and management skills.

During training program, we found him Punctual, Hardworking and Sincere. We appreciate the participation and wish him all success in future for his active participation.

Date:- 15<sup>th</sup> December, 2019

### TO WHOM SO EVER IT MAY CONCERN

This is to certify that the academic Project Work, titled as "**Design and Manufacturing of Wheel Mould**" for the academic year 2019-20 of the following students of Final Year B.E. (Mechanical) from **Nashik District Maratha Vidya Prasarak Samaj's Karmaveer Adv. Baburao Ganpatrao Thakare College of Engineering, Nashik**, have been sponsored by our organization:

- 1) Mr. Roshan Bhausahab Kedar
- 2) Mr. Hemant Mohan Nerkar
- 3) Mr. Rushikesh Suresh Nikumbh
- 4) Ms. Megha Anil Parkhe

The tenure of their Project Work is from June, 2019 To April, 2020.

During their Project Work, they are required to abide by all the Rules and Regulations of the Organisation plus they have to complete the given task at hand in the stipulated time.
